**HotWoT 2019: The Second ACM/IEEE Workshop on Hot Topics on Web of Things**

November 9, 2019 | Washington DC

---

**Important Dates**
- Paper submission due: **August 2, 2019 (AOE)**
- Notification of acceptance: **September 6, 2019**
- Camera-ready due: **September 20, 2019**
- Workshop date: **November 9, 2019**

**Overview**

In the era of Web of Things (WoT), interactions among physical objects become a reality thanks to the advances in communication technologies, information processing, embedded computing, and smart devices. We envision WoT, which captures the essence of how web technologies develop on top of the Internet of Things, will be a fundamental infrastructure for next generation computer systems.

HotWoT is a forum that brings together researchers and practitioners interested in the design, implementation, and evaluation of Web of things (WoT) systems and applications.

Sponsored by the ACM and the IEEE Computer Society, the workshop seeks to act as a conduit for the presentation of novel approaches used in support of performance, scalability, and security of WoT systems and applications, including technologies to enable seamless integration of physical things, Web of things searching/indexing/discovery, content distribution and delivery networks, Web of Things services, online social/physical networks, mobile Web, and edge computing. In particular, we aim to bring together researchers and practitioners from academia and industry working on Web of Things to discuss new ideas in this emerging area.

HotWoT 2019 welcomes contributions in all areas of infrastructure, protocols, applications, security, and user interactions related to the Web of Things. Particular areas of interest include, but are not limited to:

- Web discovery, indexing, search
- Integration of things based on web technologies
- Novel applications
- Deployment experience
- Architecture design
- Protocols
- Security and Privacy
- Cloud and edge support of WoT
- Real time communication with physical things

Papers describing timely research contributions in HotWoT’s areas of interest are solicited. Papers reporting on initial results as well as papers discussing mature research projects or case studies of deployed systems are sought out. Submissions describing big ideas that may have significant impact and could lead to interesting discussions at the workshop are encouraged.

**Paper Preparation and Submission**

Submitted papers must be neither previously published nor under review by another workshop, conference or journal. Only electronic submissions in PDF will be accepted. Submitted papers must be written in English, must be no longer than 6 pages with minimum 10pt font, must render without error using standard PDF viewing tools, must print on US-Letter-sized paper, and must be generated using the ACM acmart template available at https://www.acm.org/publications/proceedings-template. Any questions about paper submissions can be emailed to hotwot2019@gmail.com.

At least one of the authors of each paper accepted for presentation in HotWoT 2019 must register for the workshop. All papers presented at the workshop will be included in the ACM Digital Library.

**Workshop Organizers**

**Program Co-Chairs**

- **Hang Liu**, The Catholic University of America, USA
- **Yifan Zhang**, Binghamton University, SUNY, USA

**Program Committee**

- **Christian Becker**, University of Mannheim, Germany
- **Brian Davison**, Lehigh University, USA
- **Chenfei Gao**, AT&T Lab Research, USA
- **Aniruddha Gokhale**, Vanderbilt University, USA
- **Christine Julien**, University of Texas at Austin, USA
- **Olaf Landsiedel**, Kiel University, Germany
- **Alessandro Margara**, Politecnico di Milano, Italy
- **Tobias Meisen**, University of Wuppertal, Germany
- **Marina Mongiello**, Polytechnic University of Bari, Italy
- **Xiaohui Peng**, Chinese Academy of Science, China
- **Zhengrui Qin**, N. Missouri State University, USA
- **Michael Sheng**, Macquarie University, Australia
- **Christopher Stewart**, Ohio State University, USA
- **Chiu Tan**, Temple University, USA
- **Craig Wills**, Worcester Polytechnic Institute, USA
- **Lina Yao**, University of New South Wales, Australia
- **Shanhe Yi**, VMware, USA
